PROFILE

Business Management graduate (2025) currently completing a BSc in Applied Computing, combining hands-on experience in supply chain and inventory operations with a growing technical portfolio in databases, software development and AI governance. Seeking junior opportunities in AI, Data & Tech.

TECHNICAL PROJECTS

AI Act Compliance Auditor
Python · AST · YAML · pytest · CI · 2026
Static analysis of repositories against Regulation (EU) 2024/1689 (consolidated text) and the GDPR: 11 deterministic detectors with no LLM in the verdict path, a YAML rule catalogue with 12 cited obligations, and Markdown/JSON/PDF reporting. Every finding states the preconditions the analysis cannot verify. 122 tests plus mutation verification in CI across Linux, macOS and Windows. github.com/jjpp01x/aiact-auditor

Inventory Management System — Heierling GmbH
PostgreSQL 16 · Docker · Python · 2026
University coursework (Information Engineering module) based on a Swiss custom ski-boot shop, not a commissioned project: E/R model, relational schema with functions, trigger, view and indexes; role-based permissions and operation auditing. Deployed with Docker Compose (PostgreSQL + Python 3.11/psycopg2). github.com/jjpp01x/heierling

Ski Ticketing System — dual implementation
C17 · Python · SQLite · 2025–2026
Ticketing application built twice — in C (~1,500 LOC) and Python — with SQLite persistence, admin/agent roles (RBAC), audit trail, soft-delete cancellations, CSV/JSON export and unit tests. github.com/jjpp01x/Ski-resort-ticketing-system

Personal portfolio website
Next.js · TypeScript · MDX · 2026
Trilingual (ES/EN/DE) site with static export and GitHub Actions deployment; 100/100 desktop Lighthouse across performance, accessibility, best practices and SEO. josepalacios.site · github.com/jjpp01x/Pagina_Web_CV
